

COVID-19

BEFORE YOU ENTER

Do you have any new or worsening symptoms that are not related to other known causes or conditions you already have?

- Fever above 37.7 degrees or chills
- Cough
- Shortness of breath
- Decrease or loss of sense of taste/smell
- Muscle aches and/or joint pain (for adults)
- Extreme tiredness (for adults)
- Nausea, vomiting and/or diarrhea (for children/youth)

If you received a COVID-19 vaccination in the last 48 hours and have a mild headache, fatigue, muscle ache and/or joint pain that only began after immunization, and no other symptoms, answer **"No"** to those questions.

Has a health care provider or public health unit told you that you should currently be self-isolating or staying home?

In the last 10 days, have you received a COVID alert exposure notification on your cell phone? If you already went for a test and got a negative result OR if you are fully vaccinated* or previously positive**, answer **"No"**.

In the last 10 days, have you been identified as a "close contact" of someone who currently has COVID-19? If you are fully vaccinated* or previously positive**, do not have symptoms and have not been told to self-isolate, answer **"No"**.

In the last 14 days, have you travelled outside of Canada AND been advised to quarantine per the federal quarantine requirements?

In the last 10 days, have you tested positive on a rapid antigen test or home-based self-testing kit? If you have since tested negative on a lab-based PCR test, answer **"No"**.

Is anyone you live with currently experiencing any new COVID-19 symptoms and/or waiting for test results? If you are fully vaccinated* or previously positive**, do not have symptoms and have not been told to self-isolate OR if the person's symptoms are related to receiving their COVID-19 vaccine in the last 48 hours, answer **"No"**.

* **Fully vaccinated** means that you received all required doses of an approved COVID-19 vaccine at least 14 days ago. See our website for more detailed information.

** **Previously positive** means that you had COVID-19 within the past 90 days, you recovered and you completed your isolation period from your initial infection.

If you are immunocompromised, you should continue to follow all standard public health direction, even if you are fully vaccinated. If you have questions, speak to your healthcare provider.

CDS-0736, 21/07/19

DO NOT ENTER if you answered YES to any of the questions, and stay home.
